## 0-10V LIGHTING CONTROL MODULE WITH METERING AND TEMPERATURE

### Description

The Mx-USR-LM Lighting Control Module responds to a variety of wireless EnOcean devices to control and dim LED drivers, fluorescent ballasts, or other switchable loads. The Mx-USR-LM offers bi-directional, ON/OFF and 0-10V dimming control when combined with a wireless light switch or automatic shut-off when combined with a wireless occupancy sensor. Additionally, the Lighting Control Module can perform occupancy-based setback dimming and self-contained daylight harvesting functions. The Mx-USR-LM can be paired to compatible devices manually and for more sophisticated configuration, the MES software tool airConfig is available for download at [download.magnum-innovations.net](http://download.magnum-innovations.net). For manual pairing instructions, please refer to the Mx-USR-LM Installation Guide.

### Operation

The Mx-USR-LM operates on 100 to 277 VAC and includes one relay. It also includes 0-10V DC output for control of dimmable loads, including electronic ballasts. The Mx-USR-LM receives signals from wireless sensors, switches and software as well as BACnet to EnOcean commands using Mx-EBOX.

### Applications

The Mx-USR-LM is ideal for single or multiple fixtures on/off or dimming control applications. This device is appropriate for new construction as well as retrofit, including commercial offices, conference rooms, class rooms, hotels, residence halls, common areas and more.
